INTERNSHIP EXPERIENCE

Netcamp

June 2020 (Online)

- Multiple Services in one app in which I can work with Android with core java where I create one app where mostly service which is available in android is present on that app and We can also store data in firebase if somebody use login account

PROJECTS

Mini Project

- Health Insurance company website in which we work with Angular, Typescript where We give best plans to our user for insurance. And we serve the plans with age criteria like children's plans are different old people have different plans. We also create some cards with some features.
- A website naming "Placement portal" contains all the details of current and upcoming drives like selection round details, company criteria, job role, salary, job location, etc. Students can submit their consent and prepare accordingly with the help of our site.

Projects

- Gym website using front-end
